3 Days	£850	£170	£1020
4 Days	£1100	£220	£1320

2. Terms and Conditions

Application

An application form must have been completed, signed and received at least 10 working days before the examination date. Furthermore, a period of at least two calendar weeks should be allowed before the commencement of any Ground School in order to provide sufficient time to read and as far as is possible at this stage, understand the Ground School Handbook.

Payment of Fees

All appropriate fees must be paid prior to the day the candidate takes either the Ground School or the Flight Operations Assessment. Phoenix UAV Centre reserves the right to amend fees as necessary. All fees are subject to the addition of VAT at the prevailing rate.

Refunds

Non Attendance: No refunds will be provided if the candidate fails to attend a scheduled Ground School, Flight Training or Flight Operations Assessment.

If the candidate so chooses, they can transfer to an alternative date as agreed at the time. This will simply be a no extra charge or refund transfer.

Weather: If the weather is bad on the day of your scheduled Flight Training or Flight Operations Assessment, the candidate must agree with Phoenix UAV Centre staff an alternative date at least 24 hours prior to the commencement of the activity. For Flight Training Phoenix UAV Centre staff will be in contact with the candidate to rearrange the training. In the case of a Flight Operations Assessment, it is the candidates responsibility to accurately forecast the weather and inform Phoenix UAV Centre staff as to whether the assessment should go ahead or be postponed until a later date.

Regulations/Insurance

Before any candidate flies their own aircraft, they must prove to Phoenix UAV Centre staff that they have a label on their aircraft displaying their correct CAA Operator ID and proof of their Flyer ID to hand. This is mandatory for all aircraft.

Candidates should prove they have at least public liability insurance before any flight on their own aircraft can commence. Furthermore, this insurance should conform to regulation EC 785/2004 and be clearly stated in their policy documentation. This policy documentation should be made available to Phoenix UAV Centre staff before commencement of the Flight Operations Assessment.

Flight Training: If the candidate wishes to partake of Flight training with Phoenix UAV Centre, they are covered under our insurance policy for training purposes only while a Phoenix UAV Centre instructor is present. This covers Public Liability only and not their own aircraft if they choose to fly it. If the candidate chooses to fly their own aircraft without a Phoenix UAV Centre instructor present, they do so under their own insurance and risk.

Dates and Venues

Phoenix UAV Centre offer a comprehensive all in one location system. Our training room is right next to the flying field and therefore can offer ultimate flexibility. Phoenix UAV Centre offer Ground Schools on a very regular basis on our site and can for custom Ground Schools attend a clients site and run the course there instead. This must be for classes of four candidates or more at any one sitting and arranged by prior agreement.

Flight Operational Assessments are carried out on Phoenix UAV Centre's primary field but can similarly be done on a clients site by prior agreement and are subject to a site visit by Phoenix UAV Centre staff before any Flight Operations Assessment can take place. This prior site visit is at extra cost to the client.

Phoenix UAV Centre reserves the right to amend and change any date at any time but will always strive to provide at least two weeks notice to any candidate currently booked on to that Ground School. Furthermore, at least 24 hours notice will be provided to candidates scheduled to attend their Flight Operations Assessment.
